#### **Automatically delivered to your partners daily.**

Creating your own daily briefing for the healthcare sector would require a substantial investment of time and money. The MESH Situational Awareness Brief is an affordable, fully customized, turnkey solution delivered from our system directly to your recipients at a consistent time each day.

#### **Supports routine and emergency healthcare operations.**

The brief is designed to be read in 30 seconds or less and the template is the same each day. Critical weather, environmental and mass gathering data supports daily operations, informs surge planning and improves clinical decision making.

#### **Analysis included.**

The daily threat analysis highlights real-world emergency events, operational threats and breaking news from the healthcare sector. Every brief includes action steps designed to build resilience and save lives.

# Situational Awareness Brief

“The MESH Situational Awareness Brief provides our department with a way to reach out to healthcare providers throughout our community to build relationships and promote a common operating picture. Healthcare providers tell us this healthcare intelligence is valuable to them as they plan their daily clinical activities and we know that a common operating picture is critical to our work at the Marion County Public Health Department in the event of a disaster or public health crisis.

**Virginia A. Caine, M.D.**

**Director**

**Marion County Public Health Department - Indianapolis, Indiana**

“The MESH Situational Awareness Brief is very beneficial in keeping Indiana Emergency Medical Services for Children up to date with medication alerts, care recommendations, disaster planning updates, as well as environmental updates impacting the health and well-being of our pediatric population across the state. I frequently include links and updates from the Brief within our daily prevention tips as well as newsletter updates for local and statewide physicians, nurses, and EMS personnel.”

**Stephanie Fahner, RN, BSN**

**Program Manager**

**Indiana Emergency Medical Services for Children Program**

“Prior to the start of every shift in the Emergency Department, I consult the MESH Situational Awareness Brief. The Brief helps me anticipate clinical demands and identify potential threats. I also appreciate that the information in the Brief is actionable. This is not a theoretical newsletter - it is a valuable clinical tool.”

**Dan O’Donnell, M.D.**

**Assistant Clinical Professor**

**Indiana University Health Emergency Medicine**
